

1. Title	Install mechanical equipment of swimming pool systems	
2. Code	EMPDIN403A	
3. Range	Perform tasks of installing mechanical equipment of swimming pool systems according to drawings.	
4. Level	4	
5. Credits	6	
6. Competency	<u>Performance Requirements</u> 6.1 Knowledge of installing mechanical equipment of swimming pool systems ◆ Understand the construction and operating principles of various types of mechanical equipment of swimming pool systems ◆ Read installation drawings of mechanical equipment of swimming pool systems ◆ Understand the installation requirements and specifications of such equipment 6.2 Methods and procedures of installing mechanical equipment of swimming pool systems ◆ Know the installation procedures and methods for mechanical equipment of swimming pool systems, including the procedures of material checking, assembly, adjustment and testing ◆ Select and use suitable accessories and materials for the mechanical equipment of swimming pool systems ◆ Install and set various kinds of swimming pool systems and parts like water pumps at suitable locations according to installation instructions ◆ Use workshop and worksite equipment and tools safely and skilfully, e.g. threading machine, electric drill, bench fitting tools and welding machine 6.3 Professionalism in installing mechanical equipment of swimming pool systems ◆ Perform tasks of installing mechanical equipment of swimming pool systems according to installation instructions ◆ Understand the safety guidelines required by the law and code of practice in undertaking tasks of installing mechanical equipment of swimming pool systems	
7. Assessment Criteria	The integrated outcome requirements of this unit of competency are: (i) Capable to complete installation of mechanical equipment of swimming pool systems systematically and efficiently; and (ii) Capable to undertake tasks of installing mechanical equipment of swimming pool systems safely according to the code of practice of the trade.	
8. Remarks	The credit value of this unit of competency is set on the presumption that the person already possesses knowledge and skill in installing mechanical equipment of plumbing systems.
